Coconut water is
Tender Coconut water is a natural drink with gentle taste and flavor. It is rich in minerals, particularly potassium, and is a wholesome beverage for all age-groups.

The availability of coconuts are restricted to coastal areas. In their natural form transporting them to other areas means additional and substantial costs. By means of a simple and innovative preservation technique

ANU COCO Food Products makes tender coconut water easy and economically available in non-coastal areas as well. **Tender Coconut water** is preserved in natural form packed in Poly Bottles by an innovative preservation Technology. The shelf-life of the product is 5 months under cool conditions.

The product is microbiologically safe and wholesome for consumption. The Technology has been developed by DEFENCE FOOD RESEARCH LABORATORY, through Coconut Development Board, under Ministry of Agriculture, Government of India.
